PROFESSIONAL SUMMARY

I'm Carlos Andrés Montoya Tobón, a Solutions Architect and Senior Backend Engineer based in Medellín, Colombia. For the last 18+ years I've been designing and building Java-based platforms — from transportation management systems and telecom transactional portals to fintech PaaS and blockchain credentials. My specialty is the architecture and development of web applications with Spring Framework, microservices and event-driven systems deployed on AWS, GCP and Azure. I've led distributed teams of up to 45 engineers and helped organizations modernize their stacks and delivery pipelines.

EXPERIENCE

Backend Developer — Squad User Profile

Jan 2026 — Present

Coderio · Remote

- Driving a ~40% latency reduction on the Person API through targeted backend performance tuning (Java · Spring Boot).
- Hardening event auditing in the GUDD API to strengthen compliance and observability.
- Shipping user-profile domain services in a cross-functional squad (Java · Spring Boot · microservices).
- Accelerating daily delivery with AI coding assistants (Claude Code, GitHub Copilot, JetBrains Junie).

Java · Spring Boot · Claude Code · GitHub Copilot · JetBrains Junie

Backend Developer

Sep 2024 — Apr 2026

F2X SAS · Medellín, Colombia

- Designed a commissions-calculation component for the F2X memberships product (Java · Spring Boot · hexagonal architecture on AWS · Postgres).
- Designed a billing component for the F2X fuel-services product across the microservice fleet.
- Owned production-incident response and operational support for backend services.

Java · Spring Boot · Microservices · Hexagonal Architecture · AWS · PostgreSQL

Backend Developer

Jan 2024 — Jan 2025

Blerify · Delaware, USA (Remote)

- Built a blockchain-based digital credentials verification platform (Java backend on Kubernetes).
- Wired edge security with Keycloak (OAuth2/OIDC) and KrakenD API Gateway across the microservice fleet.
- Operated GKE clusters on Google Cloud: administration, upgrades and observability.

Java · Keycloak · KrakenD · Kubernetes · GKE · Google Cloud

Backend Developer

Aug 2023 — Dec 2023

SM TECH SAS · Medellín, Colombia

- Built backend features for the Draiver platform — AI-driven orchestration of an insured nationwide driver marketplace that moves vehicles, handles title and registration documents and runs readiness tasks (Java · Spring Boot · hexagonal architecture on AWS · Postgres).
- Led code reviews and drove bug-resolution practices across the backend team.

Java · Spring Boot · Microservices · Hexagonal Architecture · AWS · PostgreSQL

Backend Developer

Apr 2022 — Jun 2023

TUL SAS · Medellín, Colombia

- Built warehouse-management modules for the TUL B2B marketplace microservice fleet (Java · Spring Boot · hexagonal architecture on AWS · Postgres).
- Delivered Spring Security components and ran platform-wide code-quality reviews.

Java · Spring Boot · Spring Security · Microservices · Hexagonal Architecture · AWS · PostgreSQL

Backend & DevOps Engineer

May 2021 — Feb 2022

Linked · Remote

- Wired 15+ microservices into continuous integration and deployment pipelines.
- Stood up the DevOps toolchain from scratch: Jenkins, SonarQube, Nexus and Docker.

Jenkins · SonarQube · Nexus · Docker · Microservices

Solutions Architect

Aug 2020 — Feb 2022

KLEVER SAS · Medellín, Colombia

- Architected PaaS solutions on AWS for MutualSER's next-gen health-insurance products (Colombian EPS).
- Designed reusable security and Keycloak/GCP integration frameworks consumed across product teams.
- Mentored developers on Spring, SOLID principles and clean architecture.

Java · Spring Boot · AWS · Keycloak · GCP

Technical Lead & Solutions Architect LATAM

Tata Consultancy Services · LATAM

- Led a 45+ developer team delivering the Claro Perú transactional self-service portal.
- Designed the Oracle Service Bus integration layer for Claro Colombia.
- Built WebSphere Portlet components and the CI infrastructure that sustained the LATAM delivery.

Java · Oracle Service Bus · WebSphere · Jenkins

Aug 2013 — Sep 2015

Solutions Architect & DevOps Engineer

PATH — INNKUA · Medellín, Colombia

- Architected NetPlanet data-analysis components for the Claro telecom network.
- Delivered vehicle-tracking platforms, IoT pilots for the City of Medellín and AWS/on-prem infrastructure across 11 years of evolving projects.

Java · AWS · IoT · Spring Boot

Nov 2009 — Jan 2021

Technical Lead & Solutions Architect

Grupo Nethexa · Medellín, Colombia

- Led the technical design of predictive call systems integrating Java with Asterisk telephony.
- Built SMS-delivery, mail-marketing and Raspberry Pi digital-signage platforms.

Java · Asterisk · Raspberry Pi

Jun 2012 — Aug 2013

Senior Developer

Ceiba Software House · Medellín, Colombia

- Built loan, policy and occupational-risk systems for Suramericana (Colombian insurance leader) in Java 7 / JEE 5.
- Authored Oracle SQL stored procedures and high-throughput backend components.

Java · JEE 5 · Oracle SQL

Jun 2009 — Jun 2010

Senior Developer

Mercurio SAS (Castor SAS) · Medellín, Colombia

- Built a Transportation Management System (TMS) for bulk-cargo and parcel logistics, used by 25+ companies (full-stack: Java + JSP frontends).
- Delivered accounting integrations in Java (JDK 1.4–8) against SQL Server and MySQL — first senior role, progressed from junior on the same product.

Java · JavaScript · JSP · SQL Server · MySQL

Apr 2007 — Jun 2009

TECHNICAL SKILLS	
Backend	Java · Spring Boot · Spring Cloud · Spring Security · Hibernate · Kafka · REST / gRPC · Keycloak
Cloud & Infrastructure	AWS · GCP · Azure · Kubernetes · Docker · GKE · KrakenD · Terraform
DevOps & Tools	Jenkins · GitHub Actions · SonarQube · Nexus · Gradle · Maven · PostgreSQL · MySQL · Oracle SQL
AI & Productivity	Claude Code · GitHub Copilot · JetBrains Junie · Prompt Engineering
